

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, SEPTEMBER 15, 1995 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL I

*** THE TEN STANDARD FIRE ORDERS ARE FIRM. ***
 *** WE DON'T BREAK THEM; WE DON'T BEND THEM. ***

Current Situation: Moderate fire activity continued across most of the U.S. Some overhead and equipment requests are anticipated with the activation of FEMA in the Southern Area to support areas affected by Hurricane Marilyn.

Eastern Great Basin Large Fires:

WHISKEY, Boise N.F. A Type II Incident Management Team (Burdick) is assigned. Heavy fuels in conjunction with spotting are hampering containment efforts. Due to increased fire activity, the contain/control dates have been pushed back a day.

SHODDE NORTH, Shoshone District, BLM. The fire has burned into an old feed lot which will complicate mop-up. Current threats are to agricultural lands, wildlife habitat and structures.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW	ENG	HELI	STRUC LOST	EST LOSS	EST COST

OUTLOOK: ** A FIRE WEATHER WATCH IS POSTED FOR EASTERN OREGON FOR THIS AFTERNOON FOR DRY LIGHTNING ***

Strong high pressure continues to dominate the interior West providing very warm and dry conditions. Moisture associated with a low pressure system off the Oregon coast will pump enough moisture onshore to allow for the development of widely scattered afternoon dry thunderstorms over northern California, southern Oregon and the northern Great Basin. Scattered showers and thunderstorms may develop in Arizona and southern Colorado on Friday afternoon. Moisture from the remnants of Hurricane Ishmael is forecasted to move into southern New Mexico by Saturday night with very heavy rainfall expected across Texas, New Mexico and southeastern Arizona. Most areas of the West will have high temperatures in the 80's to mid 90's. The desert Southwest will have highs from 100 to 110 degrees. Temperatures in New Mexico may be in the 60's and 70's due to the widespread precipitation. High pressure will dominate the northeastern states resulting in clear skies. High temperatures

in the northeast states will range from the upper 50's in the north to near 70 in the south. Moderate fire activity is expected to continue nation wide, with an increase in activity anticipated in those areas forecasted for dry lightning.
